Parte 1 – Desarrollo Matemático (Conjuntos y Lógica)

- 1. Cada integrante debe anotar su número de DNI.
 - Integrante 1: 44.527.599
 - Integrante 2: 37.802.919
 - Integrante 3: 29.823.434
 - Integrante 4: 17.529.275
- 2. A partir de los DNIs, se deben formar tantos conjuntos de dígitos únicos como integrantes tenga el grupo.
 - o Integrante 1: {4, 5, 2, 7, 9}
 - o Integrante 2: {3, 7, 8, 0, 2, 9, 1}
 - o Integrante 3: {2, 9, 8, 3, 4}
 - o Integrante 4: {1, 7, 5, 2, 9}
- 3. Realizar entre esos conjuntos las siguientes operaciones: unión, intersección, diferencia (entre pares) y diferencia simétrica.
 - Union:

$$(1 \cup 4) = \{1, 2, 3, 4, 5, 7, 9\}$$

$$(2 \cup 3) = \{0, 1, 2, 3, 4, 7, 8, 9\}$$

$$(2 \cup 4) = \{0, 1, 2, 3, 5, 7, 8, 9\}$$

$$(3 \cup 4) = \{1, 2, 3, 4, 5, 7, 9\}$$

o Intersecciones:

$$\blacksquare$$
 $(1 \cap 2) = \{2, 7, 9\}$

$$\blacksquare$$
 $(1 \cap 3) = \{2, 4, 9\}$

$$(1 \cap 4) = \{2, 5, 7, 9\}$$

$$\blacksquare$$
 (2 \cap 3) = {2, 3, 8, 9}

$$\blacksquare$$
 (2 \cap 4) = \{1, 2, 7, 9\}

$$\blacksquare$$
 (3 \cap 4) = \{2, 9\}

o Diferenciación simétrica:

$$\blacksquare$$
 (1 \triangle 3) = {3, 5, 7, 8}

■
$$(1 \triangle 4) = \{1, 4\}$$

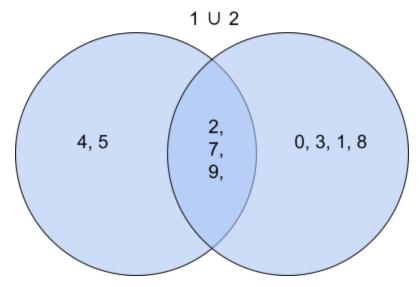

$$\blacksquare$$
 (2 \triangle 3) = {0, 1, 4, 7}

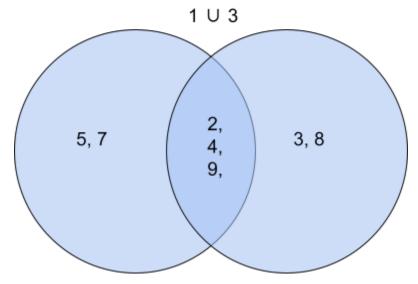

$$\blacksquare$$
 (2 \triangle 4) = {0, 3, 5, 8}

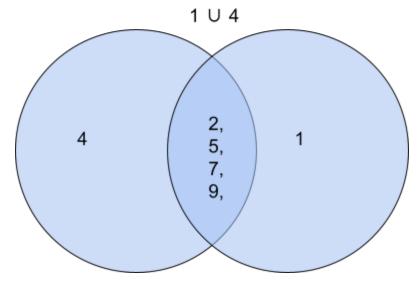

$$\blacksquare$$
 (3 \triangle 4) = {1, 3, 4, 5, 7, 8}

- 4. Para cada una de estas operaciones, se debe realizar un diagrama de Venn (a mano o digital), que debe incluirse en la entrega.
 - o Union:

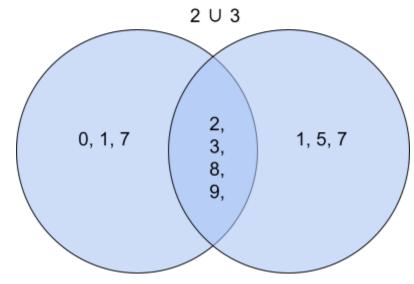

$$(1 \cup 2) = \{0, 1, 2, 3, 4, 5, 7, 8, 9\}$$

 $\qquad \qquad (2 \ \cup \ 3) = \{0, \ 1, \ 2, \ 3, \ 4, \ 7, \ 8, \ 9\}$

 $(2 \cup 4) = \{0, 1, 2, 3, 5, 7, 8, 9\}$

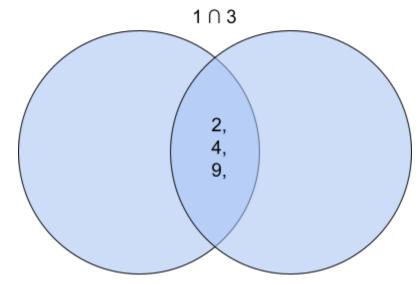

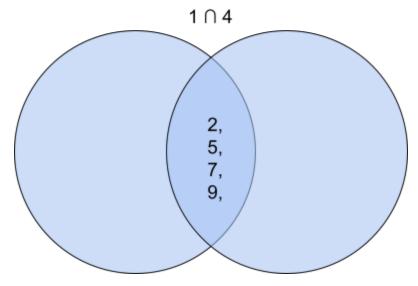

o Intersecciones:

$$(1 \cap 2) = \{2, 7, 9\}$$

 $(1 \cap 4) = \{2, 5, 7, 9\}$

 $(2 \cap 3) = \{2, 3, 8, 9\}$

 $(2 \cap 4) = \{1, 2, 7, 9\}$

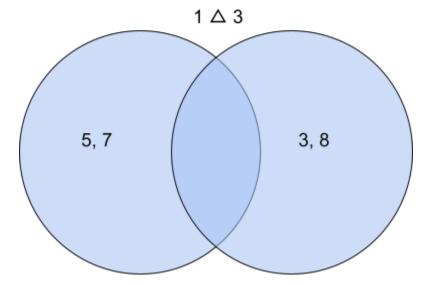

■ $(3 \cap 4) = \{2, 9\}$

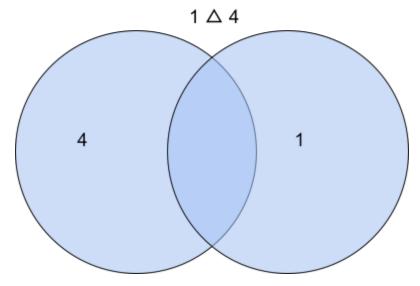

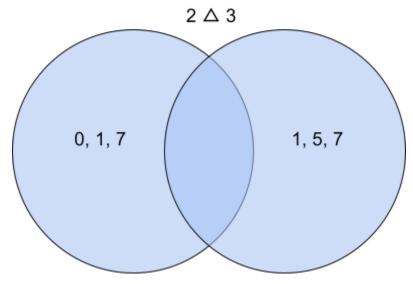

- o Diferenciación simétrica:

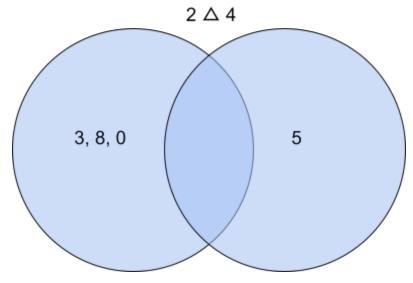

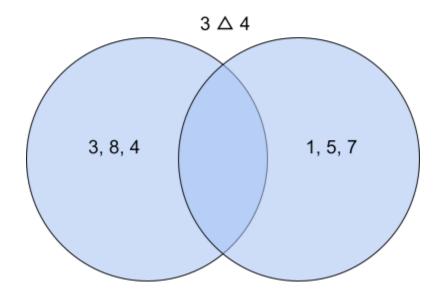

■ (1 △ 4) = {1, 4}

 $(3 \triangle 4) = \{1, 3, 4, 5, 7, 8\}$

- 5. Evaluación de condiciones lógicas (condicionales), vinculadas con las expresiones escritas.
 - Si algún conjunto tiene más de 6 elementos, mostrar "Diversidad numérica alta".
 - Si algún conjunto no tiene ningún elemento igual a cero, entonces se trata de un conjunto sin ceros.
